Site is an area of open land with green and brown
as predominant colors. Probably indicating vegetation.
Structure at site is impressive by its size.
Very big.

There is more than one structure at the site. Others are
low and clustered. There is a ^{small} ~~road~~ ^{path} at the site
and it is sandy. There is a potential association
with other structures. Funny!

Structures at the site are crumbled and pieces
are scattered. The site is isolated and
abandoned by events (AOL). Something
destructive occurred here. It is not a
nice place.

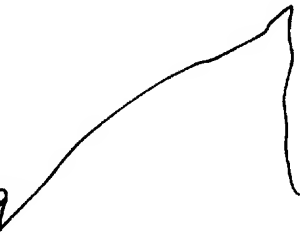

Very dry dusty taste — ash.
